

Blasting Hose Coupling

Applications

This nylon coupling is light, safe, leakproof and durable. The safety lock pin couples automatically the fittings together for highest security. The rubber seal is electrically conductive. Screws for fastening the coupling to the hose are included. Other screws should not be used, due to the risk of leakage and security. The coupling head is the same for all dimensions.

Mounting instructions

Cut the hose perfectly straight in 90° angle.
The hose end must be screwed into the bottom of the coupling and get into close contact with the seal. Fix the hose to the coupling with all the screws delivered together with the coupling
